## Statement Regarding Use of Non-GAAP Measures:

The Non-GAAP financial measures contained in this presentation (Adjusted EBITDA and Adjusted Gross Profit) are not measures of financial performance calculated in accordance with U.S. Generally Accepted Accounting Principles (GAAP) and should not be considered as alternatives to net income or gross profit. They should be viewed in addition to, and not as a substitute for, analysis of our results reported in accordance with GAAP. Management believes that these non-GAAP financial measures provide investors a view to measures similar to those used in evaluating our compliance with certain financial covenants under our credit facilities and provide meaningful comparisons between current and prior year period results. They are also used as a metric to determine certain components of performance-based compensation. They are not necessarily indicative of future results of operations that may be obtained by the Company.

## Impact of Tariffs – Work Closely with Customers to Optimize the Global Supply Chain

**In general, inflation is a positive**

- Multiple tariffs levied from Section 232 and Section 301 directly or indirectly impact all stainless & carbon products including pipe, valves, fittings and flanges
- Various levels of financial impact from minimal to positive – amount of impact dependent on the supplier, market conditions & product group including:
  - Absorption of tariff by manufacturer
  - Pass-through of tariff by distributor
- We manage the supply chain in order to minimize the impact or have a favorable outcome and we expect the most recent round of tariffs to have minimal impact on the Company
- Our contract structure – percentage mark-up, cost plus pricing with 90 day re-pricing terms
- Revenue impact – higher cost products from inflation result in higher revenue and higher LIFO expense
- Margin dollars impact – more expensive materials with the same percentage mark-up result in more margin dollars

**MRC Global proactively manages the supply chain to minimize or optimize the impact of tariffs**
