### Impact of Tariffs – Work Closely with Customers to Optimize the Global Supply Chain

#### In general, inflation is a positive

#### Summary:

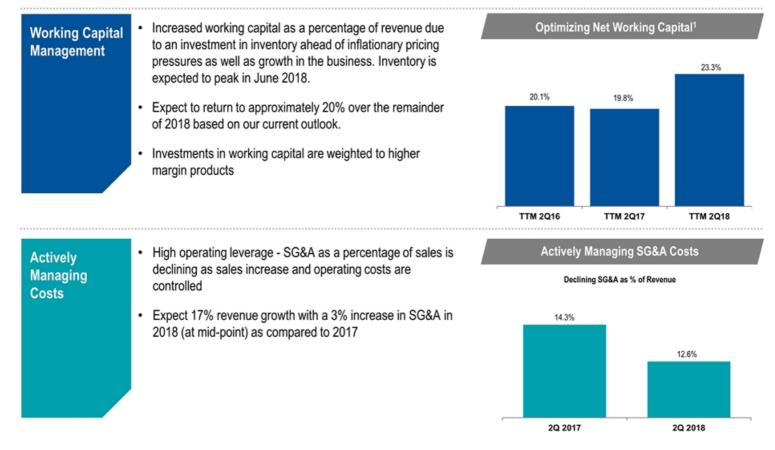

- Section 232 effective 3/23/18. Tariffs & quotas substituted for tariffs, various countries affected differently
- · Section 301 tariffs affect certain valves and valve parts manufactured in China
- · Directly or indirectly impacts all stainless & carbon products including pipe, fittings and flanges
  - Approx. 40% of revenue affected
  - Inventory: Carbon ~70% domestic, 30% imported. Stainless~40% domestic, 60% imported.
- Valves are also being impacted by Chinese regulations, resulting in the closure of steel manufacturers and casting foundries. Actions lead to inflationary pricing & extended lead times
- Steel products have been experiencing increased raw material costs leading to price increases and the potential for additional increases due to anti-dumping and countervailing duty investigations exists
- Rising prices 2Q18 average price of pipe is 32% greater than the 2Q17 average price (per Pipelogix)

#### Impact:

- Contract structure cost plus pricing with 90 day re-pricing terms
- Revenue higher cost products from inflation result in higher revenue and higher LIFO expense
- Margin dollars more expensive materials with the same percentage mark-up result in more margin dollars

MRC Global is well-positioned with carbon, stainless and valve suppliers
