### Statement Regarding Use of Non-GAAP Measures:

The Non-GAAP financial measures contained in this presentation (EBITDA, Adjusted EBITDA, Adjusted EPS and variations thereof) are not measures of financial performance calculated in accordance with GAAP and should not be considered as alternatives to net income (loss) or any other performance measure derived in accordance with GAAP or as alternatives to cash flows from operating activities as a measure of our liquidity. They should be viewed in addition to, and not as a substitute for, analysis of our results reported in accordance with GAAP, or as alternative measures of liquidity. Management believes that certain non-GAAP financial measures provide a view to measures similar to those used in evaluating our compliance with certain financial covenants under our credit facilities and provide financial statement users meaningful comparisons between current and prior year period results. They are also used as a metric to determine certain components of performance-based compensation. The adjustments and Adjusted EBITDA are based on currently available information and certain adjustments that we believe are reasonable and are presented as an aid in understanding our operating results. They are not necessarily indicative of future results of operations that may be obtained by the Company.

**Industry's first valve and combined North American PFF contract**

## Large, Fragmented Market with Significant Growth Opportunities

### Global E&P Spending Growth – Positive Secular Trends (Target 6 – 7% Annually)

- **Global Energy Demand Favorable:** Continued general economic recovery, commodity price environment, global supply constraints and increased energy consumption
- **Shale Activity Unprecedented:** Shale gas, as a percentage of total natural gas production, has rapidly increased from less than 2% of total U.S. natural gas production in 2001 to 30% in 2011 and is projected to increase to 49% by 2035
- **Accelerating MRO:** Increased utilization of processing facilities and decreasing quality of energy feedstocks accelerating PVF replacement rates
- **Recovering Project Outlook:** Infrastructure and E&P projects rebounding with economic growth and need for capacity expansions

### Organic Growth – Leverage Scale (Target: 8 – 9% Annually)

- **One-Stop Solution:** Leverage extensive product offering and be “one-stop” PVF solution
- **Cross-Selling:** Introduce existing customers to complete PVF product portfolio
- **Projects:** Further penetrate existing customer’s project activity
- **Investments:** Add incremental branches, DCs and sales people
- **International:** Expand further globally with existing customers
- **Adjacencies:** Add new products to existing PVF “bundle” or target new complimentary end markets

### Acquisitions – Accretive Expansion (Target: 2 – 3% Annually)

- **Core Competency:** Proven ability to identify, execute and integrate strategic and tuck-in acquisitions
- **Highly Fragmented:** Opportunities to extend product offering, end markets and/or geographic coverage

### Long-term Targets:

Revenue Growth: 10-12% | Adjusted EBITDA Margin: 10+% | Leverage: 2.0 – 3.0x

Note: All targets are long term.

**MRC is in an excellent position to continue to exceed industry growth**
